

Quex — Video Script V5

Format: Product demo with narrative context · Indonesian dialogue · English subtitles · Screen recording for all app shots **Target runtime:** ~2:22 (under 3:00) **Camera:** iPhone 17 · Tripod · Wife operating **Editing:** CapCut **Location:** Kids’ bedroom — desk, chair, bookshelf with trophies, single bed **Cast:** Farid (Dad), Kindi (age 8), Raina (age 9)

DIRECTOR’S PHILOSOPHY

The judges need to see two things in under three minutes: a real problem, and a real product that solves it. The problem is shown through a family — a tired dad, a child who knows mom won’t be home, a notebook where Raina wrote something private about her friends. The product is shown through a child using it without help. No narrator. No pitch. The app and the kids do the work.

What must not happen: - Dad’s whispered thought (Shot V5-05) must not sound like a voiceover. It’s a thought, not a performance. - Raina’s “Boleh share?” (Shot V5-12) must not sound like a line. She’s asking because she thought of something. - Kindi’s comprehension moment (Beat 6) must be real. If it’s directed, it’s worthless.

RUNTIME MAP

Section	Content	Duration	Timecode
Pre-roll	Two stat slides + title card	0:11	0:00–0:11
Block 1	Problem frame	0:40	0:11–0:51
Block 2	Demo — split screen	1:08	0:51–1:59
Block 3	The one question	0:08	1:59–2:07
Block 4	Room + closing card	0:15	2:07–2:22

Total: ~2:22

PRE-ROLL — CAPCUT ONLY (NO FILMING REQUIRED)

STAT SLIDE 1 0:00–0:04

Black background. White text. Centered. Clean sans-serif. No audio.

28% of Indonesian students can't find anyone to help them with schoolwork at home.
— PISA 2022, OECD

Fade in 0.3s. Hold 3.4s. Fade out 0.3s.

STAT SLIDE 2 0:04–0:08

Black background. White text. Centered. Same style as Stat Slide 1. No audio.

53.8% of Indonesian parents couldn't accompany their children's study time — because of work.
— Kemdikbudristek/BSKAP, 2020

Fade in 0.3s. Hold 3.4s. Fade out 0.3s.

Source: Survey by Diyan Nur Rakhmah & Siti Nur Azizah, BSKAP (Badan Standar, Kurikulum, dan Asesmen Pendidikan), Kementerian Pendidikan, Kebudayaan, Riset, dan Teknologi. Data collected April–May 2020, all 34 Indonesian provinces. Published via The Conversation Indonesia, September 2020.

TITLE CARD 0:08–0:11

Black background. White text. Centered. Clean sans-serif. No audio.

Fade in 0.3s. Hold 2.4s. Fade out 0.3s.

BLOCK 1 — PROBLEM FRAME 0:11–0:51

No voiceover. No music. All information is visual.

SHOT V5-01 0:11–0:13

- **Type:** CU
 - **Angle:** Eye level to dad, slightly low
 - **Frame:** Dad's face. Screen light on his left cheek. Tired. The bookshelf behind him is out of focus — trophies visible as soft shapes. He's looking at the screen. No dialogue.
 - **Audio:** Faint room ambience only.
 - **Direction for Farid:** You're working. Nothing has happened yet. Look at the screen, not the camera. The camera doesn't exist. Hold still.
-

SHOT V5-02 0:13–0:18

- **Type:** WS
 - **Angle:** Behind dad's chair — camera is against the far wall, looking toward the door
 - **Frame:** Dad's back and shoulders take up the lower-left third. The bedroom door is in frame. It opens slowly. Two small silhouettes in the doorway. Dad doesn't turn.
 - **Audio:** Door creak. Chair fabric.
 - **Direction:** Film this with the door partially closed. Kindi should push it slowly, not swing it. The silhouettes entering — not their faces — is the shot. Let them be shapes.
-

SHOT V5-03 0:18–0:21

- **Type:** CU
 - **Angle:** Eye level to Kindi — camera low, near his chin height
 - **Frame:** Kindi's face, looking toward dad. Slightly hesitant. Not scared — just a kid who knows he's interrupting.
 - **Dialogue (ID):** *"Pah... besok ada ujian."*
 - **Subtitle (EN):** *"Dad... we have a test tomorrow."*
 - **Direction for Kindi:** You're nervous to tell dad because he's busy. Look toward where dad is sitting (off-camera left). Wait a beat before you speak — you're deciding whether to say it.
-

SHOT V5-04 0:21–0:23

- **Type:** CU
 - **Angle:** Eye level to Raina — same camera height as V5-03
 - **Frame:** Raina's face. Eyes on the floor. Not looking at dad, not looking at camera.
 - **Dialogue (ID):** *"Mama shift malam, Pah."*
 - **Subtitle (EN):** *"Mom's on the night shift, Dad."*
 - **Direction for Raina:** Eyes DOWN. Not sadness — resignation. You're stating a fact you already know. You've said this before. You're not asking for anything. Look at the floor when you say it, not at dad, not at the camera.
-

SHOT V5-05 0:23–0:28

- **Type:** CU
- **Angle:** Eye level to dad. Screen glow on left cheek.
- **Frame:** Dad's face. He heard both kids. He doesn't move. 5 full seconds of stillness — no dialogue, no reaction. Just the weight of what they said.

- **Audio:** Silence. Very faint chair creak around second 3 as he shifts weight slightly.
 - **Direction for Farid:** Don't react. Don't perform thinking. Just sit with it. The camera holds on your face — let the silence do the work.
-

SHOT V5-06 0:28–0:33

- **Type:** MS
 - **Angle:** Side — dad and the bed both visible
 - **Frame:** Dad rotate chair. He leans toward the bed and pats it once.
 - **Dialogue (ID):** *"Sini belajar. Papah temenin sambil kerja."*
 - **Subtitle (EN):** *"Come study here. Dad has work to do."*
 - **Audio:** Chair movement. Soft pat on mattress.
-

SHOT V5-07 0:33–0:37

- **Type:** MS → CU (two-beat, one continuous take or a close cut)
 - **Beat A:** Both kids sit on the bed. Raina pulls a textbook onto her lap and opens it. Kindi leans in beside her.
 - **Beat B:** CU Raina's hands on the open page. Kindi's shoulder at edge of frame.
 - **Audio:** Textbook pages turning. Sheets on the bed.
 - **Direction:** Natural movement. Don't ask them to "look studious" — ask Raina to find the chapter they're supposed to study and actually open to it.
-

SHOT V5-08 0:37–0:42

- **Type:** ECU — top-down
 - **Angle:** Camera directly overhead Raina's notebook
 - **Frame:** Raina's hand writing in a notebook. The words she writes are visible. She writes something about her friends — don't script the words. Her pen slows. Stops. **No dialogue.**
 - **Audio:** Pen on paper. Silence when pen stops.
 - **Direction for Raina:** Write what you actually think. Something like "temen-temen aku juga susah" (my friends struggle too) — but use your own words. Write it naturally. The camera is above you, not in front of you. Ignore it.
-

SHOT V5-09 0:42–0:44

- **Type:** ECU
 - **Angle:** Dad's POV — camera at standing height looking down at the notebook
 - **Frame:** The notebook page Raina was reading. Her handwriting. Dad is reading it. He wasn't meant to see this — the notebook was on the bed, face up. **No dialogue.**
 - **Audio:** Silence.
 - **Direction for Farid:** Read it. Actually read it. Don't act reading — look at the words. Hold 2 full seconds on the page. Then stand up straight (leads into the next shot). Do not rush the cut.
-

SHOT V5-10 0:44–0:48

- **Type:** ECU
- **Angle:** Close on dad's hand and the iPad
- **Frame:** Dad's thumb pulls down the notification panel. He taps the Airplane Mode icon. The WiFi arcs disappear. Signal bars go. The airplane icon appears. Hold 1 second on the confirmed after-state.
- **Audio:** Soft system tap sound. **CapCut caption:** On-device only. No internet. No API calls. — white text, bottom third, lighter weight. Appears when airplane icon confirms. Hold 2s.
- **Direction:** One deliberate tap. Not fast, not slow. He's done this before — a parent turning off internet before handing a device to kids. Don't explain the action.

Note for screen recording sessions: The airplane mode icon is now ON. It must remain visible in the status bar of ALL screen recording clips captured for Block 2. Record every screen recording clip with airplane mode already active before starting.

SHOT V5-11 0:48–0:51

- **Type:** CU
 - **Angle:** Slightly low — looking up at both kids' faces
 - **Frame:** Both Raina and Kindi. Dad's hand extends the iPad into frame from below. Kindi leans in. Raina reaches out and takes it. Their faces: curious, ready.
 - **Audio:** Silence.
-

BLOCK 2 — DEMO (SPLIT-SCREEN) 0:51–1:59

CapCut layout: Split-screen throughout. Left side = filmed footage of kids. Right side = screen recording of the iPad app. Rough sync between sides is acceptable — exact frame-for-frame sync is not required. The two sides complement each other.

Airplane mode icon: Must be clearly visible in the status bar on every right-side screen recording clip. Confirm before importing into CapCut.

Who does what: - **RAINA (9):** Holds the iPad, drives the app. She photographs the textbook, selects answers, taps the help button. - **KINDI (8):** Watches. Leans in. Asks questions. His understanding — or confusion — is the product proof.

BEAT 1 — Textbook Photo 0:51–0:57

Left (filmed): Raina holds the iPad up toward the open textbook on the bed. She frames the page and taps. Camera shutter sound. **Right (screen recording):** The app's camera view — textbook page in frame, then the capture.

- **Dialogue:**
 - Kindi: *"Gambarnya biar apa?"*
 - Subtitle: *"What's the photo for?"*
 - Raina: *"Buat soal. Diem dulu."*
 - Subtitle: *"For the quiz. Be quiet."*
 - **Direction for Kindi:** You don't know what she's doing. Brief him only: "Your sister is doing something with the app — ask what." Use whatever words he actually says. Don't give him the line.
 - **Direction for Raina:** You know what you're doing. You're a little impatient with the question. "Diem dulu" is affectionate, not mean.
-

BEAT 2 — Processing 0:57–1:02

Left (filmed): Kindi's face, curious. He leans slightly toward the screen he can't quite see. **Right (screen recording):** "Generating quiz..." processing animation.

- **Dialogue:**
 - Raina reads off screen, genuinely just reading aloud: *"Gemma 4..."*
 - Subtitle: *"Gemma 4..."*
 - Kindi: *"Itu nama siapa?"*
 - Subtitle: *"Whose name is that?"*
 - Raina: *"Nama AI-nya kayaknya."*
 - Subtitle: *"Probably the AI's name."*

CapCut caption (right side): Gemma 4 E4B · Running entirely on this phone — white, bottom third, lighter weight. Appears at second 1, holds 5s.

- **Direction:** Neither kid knows what Gemma is. That's the correct state. Don't explain it to them before filming. Their genuine confusion makes the on-screen caption land harder.
-

BEAT 3 — First Question + TTS 1:02–1:13

Left (filmed): Both kids look at the screen. They go quiet. Kindi's lips move slightly as he reads along. After TTS finishes, Raina gives her answer. **Right (screen recording):** First quiz question appears. Multiple choice options.

TTS begins reading immediately — calm, clear voice at a kid's pace.

- **Audio:** TTS voice from screen recording. Unmute device before recording. Let the full TTS read complete. Do NOT cut over the voice.
- **Dialogue (after TTS finishes):**
- Raina: *"Yang B kayaknya."*
- Subtitle: *"I think it's B."*
- **Direction:** TTS must finish before Raina speaks. The AI voice is the product. Give it space. Tell both kids before rolling: "Wait until the app finishes reading before you say anything."

BEAT 4 — Wrong Answer 1:13–1:17

Left (filmed): Raina taps her choice. **Right (screen recording):** Red highlight appears. Wrong answer feedback.

- **Dialogue:**
- Raina: *"Aduh, salah."*
- Subtitle: *"Ugh, wrong."*
- Kindi: *"Kok bisa salah?"*
- Subtitle: *"How'd you get it wrong?"*
- **Direction for Kindi:** He's genuinely surprised his older sister got it wrong. That reaction should be natural — don't direct the expression.

BEAT 5 — Help Button + AI Explanation 1:17–1:39 (adjust after testing TTS length — see Pre-Production Priority 5)

Left (filmed): Raina taps a button on screen. Both kids wait. **Right (screen recording):** "Bantu aku mengerti" (Help me understand) button tapped. AI response streams in as text. TTS reads the explanation aloud.

- **Dialogue (before TTS starts):**
- Kindi: *"Itu ngapain?"*
- Subtitle: *"What's that for?"*
- Raina: *"Minta diajarin."*
- Subtitle: *"Asking it to teach me."*

TTS begins. Both kids go quiet. Let the full explanation play. Do not add music under TTS. The voice must be audible and clear.

- **Direction:** Tell both kids before rolling: "Now listen carefully. The app is going to explain the answer. Try to understand it." They listen for real.

BEAT 6 — Kindi's Comprehension 1:39–1:44 — CRITICAL

Left (filmed): Two shots cut together: 1. Kindi's face — the moment he understands. Not directed. 2. Raina's face — she was watching him, not the screen. She sees that he got it. One quiet look. No dialogue.

Right (screen recording): The last lines of the AI explanation visible on screen.

- **Dialogue:**
- Kindi, to himself (not performing): *"Oh... jadi..."*
- Subtitle: *"Oh... so it's..."*
- **Direction for Kindi:** Before this take, pull him aside. Show him the actual question from the textbook. Ask him to think about the answer in his head — not out loud. Walk away. When he looks like he's connecting something, that's the moment to capture. If he says "Oh jadi" — good. If he makes any other genuine sound of understanding — use that. Do not announce you're filming this specifically.
- **Direction for Raina (recognition beat):** Tell Raina: "While the app is explaining, watch Kindi's face — check if he's understanding it." Film her watching him. When she sees he gets it, capture her face. She's not performing emotion — she's checking on her little brother. This is a 2-second cut. Film it regardless; it's the backup if Kindi's take doesn't land.

BEAT 7 — Correct Answer 1:44–1:47

Left (filmed): Raina taps the correct answer. **Right (screen recording):** Green checkmark. Correct answer chime.

- **Dialogue:**
 - Kindi: *"Nah, bener!"*
 - Subtitle: *"There, correct!"*
-

BEAT 8 — Airplane Mode Re-Verification 1:47–1:51

Left (filmed): ECU of Raina's hand on the iPad. She taps the status bar area — the airplane icon is visible, she confirms it's still on. **Right (screen recording):** Status bar clearly showing the airplane icon.

- **Dialogue:**
- Kindi (off-camera): *"Masih off internetnya?"*
- Subtitle: *"Is the internet still off?"*
- Raina taps once. Confirms: *"Iya, masih."*
- Subtitle: *"Yeah, still off."*
- **Direction:** One tap. Deliberate. Raina is answering her brother's question — she's not demonstrating anything. It should look like a kid confirming something, not a product demo.

Pre-production test (before filming day): Confirm the iPad status bar shows the airplane icon clearly in ECU. Test the tap — confirm it confirms ON without accidentally toggling off.

BEAT 9 — Score 1:51–1:59

Left (filmed): Both kids look at the score screen. Raina's expression: quiet satisfaction. **Right (screen recording):** Quiz complete screen. Score displayed large — e.g. 18/20. Completion animation. Hold on the score at least 5 seconds.

- **Dialogue:**
- Raina: *"Wah, lumayan!"*
- Subtitle: *"Hey, not bad!"*

CapCut caption (right side): Generated from a photo. Zero cloud. — white, bottom third, lighter weight. Appears at second 2, holds 3s.

BLOCK 3 — THE ONE QUESTION 1:59–2:07

No split-screen. Back to single frame, filmed only. Silence.

SHOT V5-12 1:59–2:02

- **Type:** CU
 - **Angle:** Eye level to Raina — slightly low, camera near chin height
 - **Frame:** Raina looking toward dad (off-screen). Not emotional. Flat. Private. She thought of something and she's asking about it.
 - **Dialogue (ID):** *"Boleh share ke temen-temen nggak?"*
 - **Subtitle (EN):** *"Can I share this with my friends?"*
 - **Direction for Raina:** You're not asking for emotional reasons. You just thought of something — your friends need this too. Look toward where dad is sitting. Say it simply. The flattest take wins. If it sounds like a script, do another take. Don't look at the camera.
-

SHOT V5-13 2:02–2:05

- **Type:** CU
- **Angle:** From Raina's side — dad's face
- **Frame:** Dad. He turns. He nods, or says one word.
- **Dialogue (ID):** *"Boleh."* (or a single nod — whichever is natural)
- **Subtitle (EN):** *"You can."*

- **Direction for Farid:** One beat. Don't set it up. Don't add context. The answer is the answer.

SHOT V5-14 2:05–2:07

- **Type:** CU — hold
- **Frame:** Dad's face. Same frame as V5-13. He doesn't move.
- **Audio:** Silence. No music. No dialogue. **Duration:** 2 full seconds. Then fade.

BLOCK 4 — ROOM + CLOSE 2:07–2:52

SHOT V5-15 2:07–2:11

- **Type:** WS — static
- **Angle:** From the corner of the room — camera in the farthest corner, looking across the full space
- **Frame:** The whole room. Trophies on the shelf. Textbooks on the desk. Rumpled bed. Dad and both kids — small figures in the frame. Nobody moves. Nobody looks at the camera.
- **Audio:** 2 seconds of silence → soft instrumental music enters at second 2, continues through the rest of the video.
- **Direction:** Static camera. Do NOT move or pan. Everything in this frame — the trophies, the desk, the bed — appeared in closer shots earlier. This is the same room seen as a whole. Nobody performs.

FADE TO BLACK 2:11–2:12

CLOSING CARD 2:12–2:22 (~10 seconds)

Music continues softly.

Quex

On-device · No WiFi · No subscription · Open source

White text on black. Centered. Clean sans-serif. Hold ~10 seconds.

AUDIO MAP

Section	Audio
Pre-roll	Silence
Block 1	Faint room ambience. Dialogue on-camera only.
Block 2 Beats 1–2, 4	Room ambience. Dialogue only.
Block 2 Beats 3, 5	TTS voice — unmuted, no music, no ambient under it. Give it space.
Block 2 Beats 6–9	Room ambience. Dialogue only.
Block 3	Silence.
Block 4 V5-15	2s silence → soft instrumental enters.
Closing card	Music continues.

CAPCUT POST-PRODUCTION CHECKLIST

Build as a new CapCut project.

Pre-roll

- ☐ Stat Slide 1: black bg, white text, PISA 2022 stat, fade in/hold/fade out
- ☐ Stat Slide 2: black bg, white text, second stat + source, same style
- ☐ Title card: black bg, white text, fade in/hold/fade out

Block 1 Assembly

- ☐ Shots V5-01 through V5-11 in sequence
- ☐ CapCut caption on V5-10: On-device only. No internet. No API calls.
- ☐ Confirm trophies shelf visible (OOF) in V5-01

Block 2 Assembly

- ☐ Set up split-screen template: left = filmed, right = screen recording
- ☐ Confirm airplane mode icon visible in status bar on ALL right-side clips before importing
- ☐ Beat 3: TTS voice audible, not cut over, no music under it
- ☐ Beat 5: Same as Beat 3
- ☐ Beat 6: Kindi comprehension cut + Raina recognition cut — pick best genuine takes
- ☐ CapCut caption Beat 2 right: Gemma 4 E4B · Running entirely on this phone
- ☐ CapCut caption Beat 9 right: Generated from a photo. Zero cloud.

Block 3

- ☐ Remove split-screen, return to single frame
- ☐ V5-12, V5-13, V5-14 — no music, no caption

Block 4

- ☐ V5-15: Static wide, no camera movement
- ☐ Music enters at second 2 of V5-15
- ☐ Fade to black at 2:11
- ☐ Closing card — hold ~10s, music under

Subtitles

- ☐ V5-03: “Dad... we have a test tomorrow.”
- ☐ V5-04: “Mom’s on the night shift, Dad.”
- ☐ V5-06: “Come study here. Dad has work to do.”
- ☐ Beat 1: Kindi — “What’s the photo for?” / Raina — “For the quiz. Be quiet.”
- ☐ Beat 2: Raina — “Gemma 4...” / Kindi — “Whose name is that?” / Raina — “Probably the AI’s name.”
- ☐ Beat 3: Raina — “I think it’s B.”
- ☐ Beat 4: Raina — “Ugh, wrong.” / Kindi — “How’d you get it wrong?”
- ☐ Beat 5: Kindi — “What’s that for?” / Raina — “Asking it to teach me.”
- ☐ Beat 6: Kindi — “Oh... so it’s...”
- ☐ Beat 7: Kindi — “There, correct!”
- ☐ Beat 8: Kindi — “Is the internet still off?” / Raina — “Yeah, still off.”
- ☐ Beat 9: Raina — “Hey, not bad!”
- ☐ V5-12: “Can I share this with my friends?”
- ☐ V5-13: “You can.”

Final check

- ☐ Export and verify runtime (~2:22)
- ☐ Confirm no shots where Raina or Kindi look directly at the camera
- ☐ Confirm TTS audio clearly audible in Beats 3 and 5

☐ Confirm airplane mode icon visible throughout Block 2 right side

PRE-PRODUCTION CHECKLIST (BY PRIORITY)

Priority 1 — Second Stat (CONFIRMED ✓)

53.8% of Indonesian parents couldn't accompany their children's study time because of work. Source: Kemdikbudristek/BSKAP (Diyan Nur Rakhmah & Siti Nur Azizah), April–May 2020, all 34 provinces. Published: The Conversation Indonesia, September 2020.

Priority 2 — Test Airplane Mode Tap for Beat 8

Before the screen recording session: put iPad in Airplane Mode and test ECU of the status bar. Confirm the airplane icon is clearly visible at close range. Confirm that tapping in the status bar area confirms ON (does not accidentally toggle off).

Priority 4 — Textbook Selection and App Test

Use a real textbook page with a full topic — text, diagrams, enough content for quiz generation. Test quiz generation from a photo of this page before filming day — confirm the app produces questions.

Priority 5 — Screen Recording Session Prep

Run a separate screen recording session before filming day. Start every recording with airplane mode already active. Capture: app camera view, processing animation, first question + TTS read, wrong answer feedback, help button + AI explanation + TTS, correct answer, score screen. Review all clips: airplane icon visible, TTS audio level sufficient, all app interactions complete.

Priority 6 — Split-Screen Template

Test the CapCut split-screen layout (left + right) before filming day. Decide crop ratios — the app UI may need more horizontal space than a face crop.
